

Tales & tales

What is storytail?

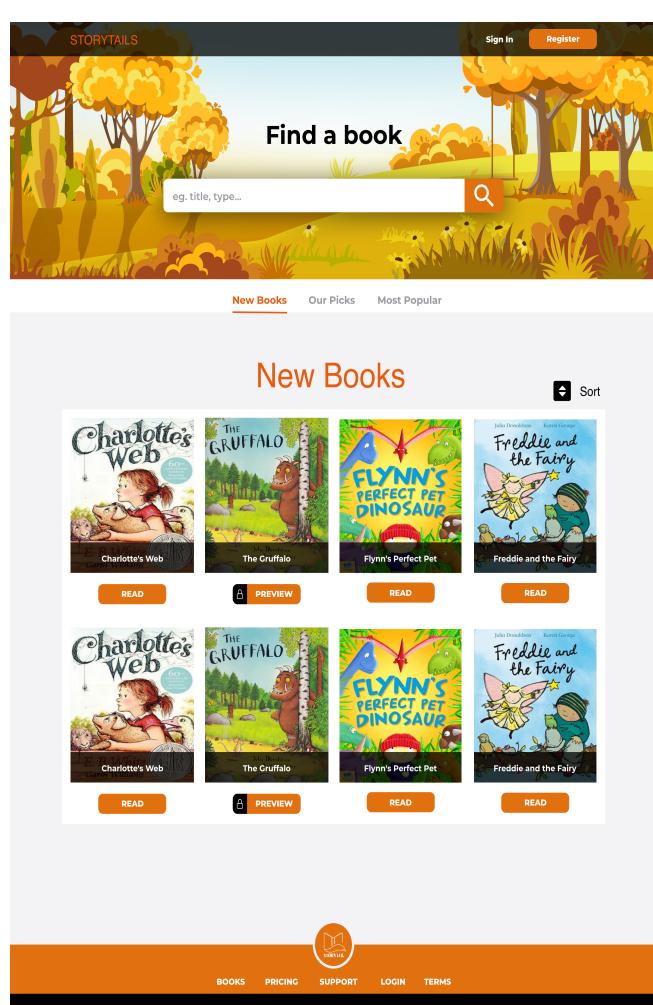

StoryTail is a innovative digital interactive library promoting English language learning for children aged 3 to 9 through stories and playful activities.

How will it look?

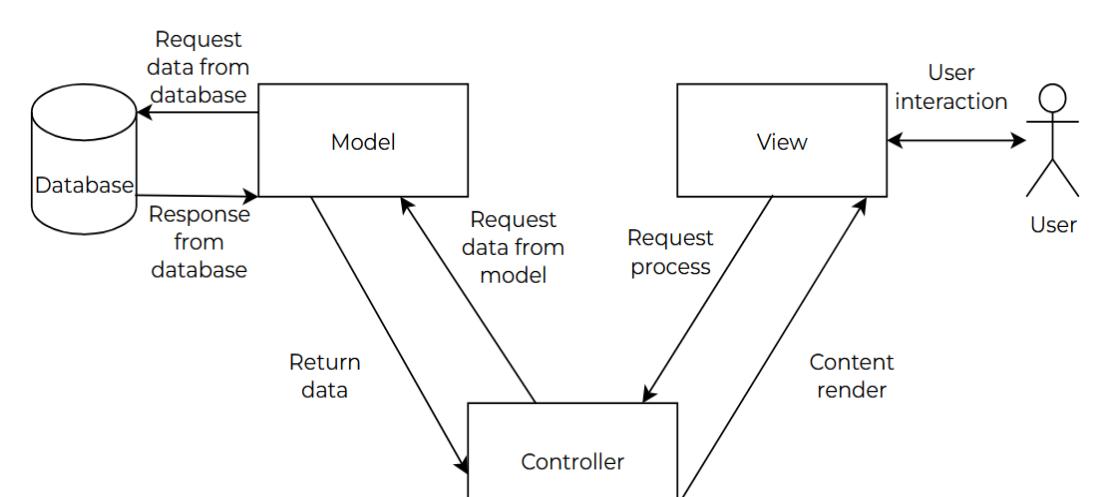

The interface is carefully designed to be accessible and visually appealing, focusing on children and providing an easy-to-use and immersive experience.

It will look bit like this:

How will it work?

Utilizing the Model-View-Controller (MVC) architecture, we ensure an organized structure, enabling the platform's continuous evolution with new features.

Aside from reading books what can you do?

Inside the website you will be able to listen to audiobooks ,for when the little ones need someone to tuck them in, do some recommended activities based on the books content, for example , after reading a book about giraffes, make a drawing or make some food art.
